Electrolyte Liquid

For Horses

RATE OF USE:

Always make available a plentiful supply of fresh clean drinking water following intake of this liquid.

HORSES, 450 TO 500KG

Light work: 40mL in 2L of water

Moderate work: 60mL in 3L of water,

Heavy work: 80mL in 4L of water

Severely dehydrated horses: 6 to 8L of diluted solution (40mL io ELECTROLYTE LIQUID/L of water)

Travelling horses: 40 to 60mL over the tongue with water on hot weather or long distances, 30 to 60 minutes before travelling. Repeat every 2 hours and again on arrival.

WITHHOLDING PERIOD: NIL

Manufactured for AIRR by

C M Laboratories Pty Ltd

1-4/36 Curtis Road, Mulgrave, NSW 2756

Store below 30°C (room temperature).

Dispose of product in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots. Do not dispose of undiluted chemicals on-site. Break crush or puncture and bury empty containers in a local authority landfill.

If no landfill is available, bury the containers below 50mm in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and roots.

Empty containers and product should not be burnt.
