# SHOTGUN®

Rabbit Bait

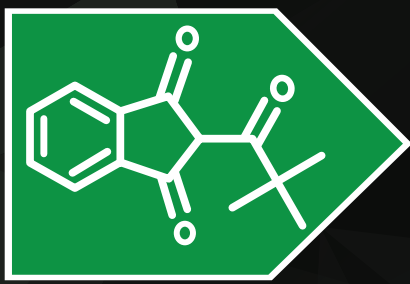

**PINDONE OAT**

## **Why control rabbits?**

Once called 'chainsaws of the outback', rabbits today are still one of Australia's most destructive introduced pests, reaping havoc on our natural environment in both the bush and our cities.

## **0.5g/kg Pindone Sodium Salt:**

A first generation anti-coagulant, initially developed for the control of rats and mice but subsequently found to be quite effective on feral rabbits, while posing lower risk to non-targets.

## **Certified Sterilised:**

We use only the highest grade sterilised oats with the anti-coagulant Pindone to ensure rapid uptake and control. SHOTGUN is certified and registered for sale in all states inc. WA

## **Developed and manufactured in Australia:**

by Freezone for the control of feral rabbits.  
Free warning gate sign included.  
(Always refer to your product label).

**PACK  
SIZES  
AVAILABLE:**  
2.5kg | 5kg | 10kg
