RANGE PURPOSE

Tried and trusted oatmeal pastes that are well tolerated by most horses. Available in two dose formulations - standard and double strength for additional economy, or horses over 700kg.

Use strategically to slow the development of ML (Mectin) or BZ (white drench) resistant parasites.

Low volume pastes presented in ergonomic syringes for easy administration. Less chance of spitting out, and syringe ideal for smaller hands.

Ideal for tubing, or for economical treatment of large numbers of horses. Available in two drench families for strategic drench resistance management.
