PREMIUM CALF & FOAL MILK REPLACER

5 KG

Scan for all species
feeding guidelines

Milktech Silver CMR has been developed to achieve maximum growth rates for your calves.

Milktech Silver CMR is formulated with a balanced combination of dairy fats and proteins, essential vitamin and mineral profile and probiotics.

MIXING INSTRUCTIONS

Dissolve the required amount of Milktech Silver CMR to half the required volume of fresh, clean warm (40°C) water. Avoid hard water. Mix to a creamy smooth consistency and add further warm water to make up the required amount. Feed at body temperature (38-40°C).

Mix only when required. Keep bag closed when not in use.

Feed after a good intake of colostrum has been achieved (from two days after birth). Ensure that clean drinking water is available at all times.

Ensure that calves have access to hay and calf feed.

Keep buckets, bottles and other equipment clean.

FEEDING INSTRUCTIONS

***Note:** Although Milktech Silver Calf Milk Replacer is a multispecies product, it has been formulated for the specific requirements of calves and foals. Please see your vet or nutritionist for advice on feeding requirements of other infant animals.

DAILY CALF DMI (AS MILK) TARGETS FOR AGE

The table below is a guide to calculate the desired Dry Matter Intake (DMI) and Feeding Volume by age.

AGE (DAYS)	MIXING RATE	FEEDS PER DAY	VOLUME PER FEED (L)	DAILY DMI (G)
1	Fresh, high quality Colostrum. Feed within the first 6 hours of birth.			
BASIC FEEDING GUIDELINES				
2 – 10	125 g/L	2	2.0	500
11 – 16		2	2.5	625
17+		2	3.0	750
PERFORMANCE FEEDING GUIDELINES				
2 – 10	130 g/L	2	2.0	520
11 – 16	150 g/L	2	2.0	600
17+		2	3.0	900

To further promote average daily gain and health, once a calf is 60 - 70 kg, consider feeding 7 L at 150 g/L over two 3.5 L feeds per day (1050 g DMI). Aim for 1.5 - 2% of a calf's body weight in dry matter intake (150 g of Milktech Silver CMR = 150 g of DMI).

DAILY FOAL FEEDING GUIDE

Use the following schedule as a guide for feeding Milktech Silver CMR to a typical light-breed foal. Foals should receive 10 - 15% of their body weight in milk daily. Consult your Vet or an experienced Foal rearer for advice about husbandry of foals any variation from these recommended feeding guidelines.

Foal Mixing ratio - 125g Milktech Silver Calf Milk Replacer to one litre of water - refer programmes.

AGE (DAYS)	VOLUME PER DAY (L)	VOLUME PER FEED (ML)	FEEDS PER DAY	FEEDING INTERVALS (HRS)
1	COLOSTRUM - Feed 10% of body weight.			
2 - 3	5.0	500	10	2
4 - 7	5.0	625	8	2 - 3
8 - 14	6.0	1,000	6	4
15 - 21	7.5	1,500	5	4
22 - 42	12.0	3,000	4	6
43 - Weaning	12.0	4,000	3	7

Wean between 3 - 5 months of age if regularly eating solid food, pasture and hay. Gradually reduce daily milk volumes until foal is completely weaned.

Ponies: Feed at half the feeding volume.

STORAGE

Store Milktech Silver CMR in a cool, dry, well-ventilated environment below 25°C and 65% humidity. Avoid direct sunlight and contact with floors and walls. To maintain product integrity, store in a sealed container after opening.
